About TIC (Homepage Summary)

The Tech-Innovation Challenge (TIC) is a national innovation programme created by the Nigerian Content Development & Monitoring Board (NCDMB) to identify, nurture, and accelerate high-potential innovators developing solutions for Nigeria's oil, gas, and energy sectors.

Through a competitive multi-stage process—screening, pitching, mentorship, bootcamp, and final showcase—TIC empowers innovators with the skills, exposure, and support needed to scale their ideas into impactful solutions.

Programme Phases (Homepage Summary)

Screening: Review of applications to select the top 30 innovators.

Online Pitching: Virtual pitch sessions to shortlist 15 finalists.

Mentorship: Four-week structured training with industry mentors.

Bootcamp: Intensive physical development programme at NCDMB Tower, Yenagoa.

Finals: Live pitch presentations and winner selection.

Incubation: Post-competition support, funding access, and industry linkages.

Featured News Section Intro

Stay updated with the latest announcements, programme milestones, and stories from the TIC innovation community.

Partners Section

The Tech-Innovation Challenge is proudly hosted by the **Nigerian Content Development & Monitoring Board (NCDMB)** and **powered by the Entrepreneurship & Innovation Centre Ltd (EICL)**, with support from industry partners and innovation stakeholders.

2. ABOUT TIC PAGE TEXTS

What is TIC?

The Tech-Innovation Challenge (TIC) is a strategic initiative of the Nigerian Content Development & Monitoring Board (NCDMB) aimed at strengthening Nigeria's innovation ecosystem by supporting technology-driven solutions that advance the oil, gas, and energy sectors.

TIC provides a platform for innovators, researchers, and entrepreneurs to showcase their ideas, receive expert mentorship, and gain access to funding and industry networks.

Programme Objectives

- **Identify high-potential innovators** developing solutions for Nigeria's energy sector.
- **Build capacity** through structured mentorship and technical training.
- **Accelerate innovation** by supporting prototype development and market readiness.
- **Strengthen local content** through indigenous technology solutions.
- **Promote sustainability** by building a long-term innovation pipeline for future TIC cycles.

Impact Vision

TIC aims to become Nigeria's leading innovation pipeline—producing a new generation of energy innovators, strengthening research capacity, and enabling scalable solutions that contribute to national development.

Programme Ownership

The Tech-Innovation Challenge is owned and led by the **Nigerian Content Development & Monitoring Board (NCDMB)**.

The programme is **powered by the Entrepreneurship & Innovation Centre Ltd (EICL)**, serving as the official Programme Consultant responsible for design, coordination, and implementation.

3. CURRENT EDITION PAGE (TIC 2026)

Edition Overview

The **2026 Maiden Edition** of the Tech-Innovation Challenge marks the beginning of a national journey to discover and empower Nigeria's brightest innovators in the energy sector.

This inaugural cycle brings together 30 shortlisted innovators, 15 finalists, 10 mentors, and a distinguished panel of judges to shape the future of indigenous technology development.

Key Highlights

- Nationwide call for applications
- 30 innovators selected for screening
- 15 finalists chosen through online pitching
- 4-week mentorship programme
- 6-day physical bootcamp at NCDMB Tower
- Grand finale and awards ceremony
- Post-competition incubation and funding support

4. PROGRAMME STRUCTURE PAGE TEXTS

Stage 1: Screening

Applications are reviewed by an 8-member expert panel using a structured scoring rubric assessing technical merit, novelty, feasibility, and industry relevance.

Output: Top 30 innovators selected.

Stage 2: Online Pitching

Shortlisted applicants pitch virtually before a panel of judges. The top 15 finalists are selected based on clarity, innovation, impact potential, and scalability.

Output: 15 finalists announced.

Stage 3A: Mentorship

Finalists undergo a four-week virtual mentorship programme covering business modelling, pitch refinement, technical development, and market strategy.

Output: Finalists prepared for bootcamp.

Stage 3B: Bootcamp

A six-day intensive physical bootcamp at NCDMB Tower, Yenagoa featuring hands-on sessions, prototype refinement, pitch practice, and expert feedback.

Output: Final pitch readiness.

Stage 4: Finals

Finalists present their solutions to NCDMB leadership and a panel of judges. Winners are selected and awarded based on innovation, feasibility, and industry impact.

Output: Winners announced.

Post-Competition Incubation

Winners receive product development support, access to NCDMB's innovation space, funding pathways, and industry linkages to scale their solutions.

5. TIMELINE PAGE TEXT

Explore the full timeline of the Tech-Innovation Challenge—from application launch to incubation. Each milestone represents a critical step in the journey of transforming ideas into impactful solutions.

6. JUDGES & MENTORS PAGE TEXTS

Judges

Our panel of judges comprises seasoned industry leaders, technical experts, and innovation professionals who bring deep insight into evaluating high-potential solutions for Nigeria's energy sector.

Mentors

TIC mentors are experienced entrepreneurs, researchers, and industry practitioners committed to guiding finalists through technical refinement, business development, and pitch preparation.

7. FINALISTS & WINNERS PAGE TEXTS

Finalists

Meet the top 15 innovators selected from across Nigeria. These finalists represent the creativity, resilience, and technical excellence that TIC seeks to promote.

Winners

The winners of TIC 2026 have demonstrated exceptional innovation, strong execution potential, and the capacity to transform Nigeria's energy landscape. Their solutions will receive continued support through the TIC incubation programme.

8. APPLY PAGE TEXTS

Eligibility

The TIC programme is open to innovators, researchers, startups, and entrepreneurs developing technology-driven solutions for Nigeria's oil, gas, and energy sectors.

Application Process

1. Register on the Tech-IDEAS Portal
2. Submit your proposal
3. Screening by expert reviewers
4. Online pitching
5. Selection of finalists

Call to Action

Ready to transform your idea into a scalable solution?

Apply now through the Tech-IDEAS Portal.

9. NEWS & MEDIA PAGE TEXTS

News
